

## Aqua Rite XL. The next generation of pool sanitation.

The advantages of Aqua Rite XL automatic electronic chlorine generation over traditional factory-produced chlorine are too numerous to list.

Here are just a few of the benefits:

### Enhanced Satisfaction

- Soft, silky-smooth water
- No chlorine odor
- Minimal maintenance
- 120VAC, 60Hz, with 3 ft. plug-in line cord

### Increased Safety

- No handling or storage of toxic chemicals
- Even, consistent chlorine dispersion; no more unhealthy highs and lows
- No caustic or harmful byproducts
- NSF, CUL, PMRA and UL approved

### Reduced Maintenance and Costs

- User-friendly monitor system with LED service alerts
- Easy to use – one dial adjusts chlorine output
- Low operating costs
- 3-year limited warranty

## Pick N' Mix™ Turbo Cells®

are sold separately and are available in the following sizes:

- 40,000 gallons (151,000L)
- 25,000 gallons\* (94,000L)
- 15,000 gallons\* (56,000L)

\*Minimum software requirement 1.50

## Convenience. Performance. Innovation.

## GOLDLINE® Aqua Rite® XL SALT CHLORINATION

It's amazing what a little salt can do to enhance your pool experience.

Total System: Pumps | Filters | Heating | Cleaners  
Sanitization | Automation | Lighting | Safety

SANITIZATION

## Total sanitization through the power of salt.

Never buy, mix or measure chlorine again.

It's possible with the Aqua Rite<sup>®</sup> XL Electronic Chlorine Generator. Aqua Rite XL delivers 100 percent of the sanitization your water needs through common table salt, not factory-created chlorine. Just natural, refreshing water you can swim in without limitation.

### A little salt goes a long way.

The advanced technology of Aqua Rite XL allows it to operate efficiently on approximately one teaspoon of salt per gallon of pool water. Once the salt is added to your pool, you'll rarely need to introduce more. The easy-to-read control box displays information regarding Aqua Rite XL, including operation status and salt level.

### Turbo technology.

The science behind this safe technology lies within the Turbo Cell<sup>®</sup> that attaches to the control box. As pool water passes through the cell, Aqua Rite XL control unit generates a safe, low-voltage current that converts the salt in the water into fresh, pure chlorine. This water is then evenly dispersed throughout the pool via the return jets. The process is as effective as it is safe for added convenience and peace of mind.

Water passes through your pump, filter and heater before entering the Aqua Rite XL Turbo Cell. Freshly purified water is then returned directly to your pool.

### The advantages of switching to the Aqua Rite XL Electronic Chlorine Generator:

- Quick and easy to install in new or existing pools
- Water is soft, silky and sparkling
- Eliminates dry skin, irritated eyes and discolored hair problems associated with factory-created chlorine
- Requires roughly one teaspoon of salt per gallon
- Safe on all pool surfaces
- 3-year limited warranty\*

*Aqua Rite XL Uses a Minimal Amount of Salt*

The Aqua Rite XL Control Box mounts near your system for easy-to-read operational status.
