

HAYWARD Pool Products
One source. Every pool.

AQUA RITE™

**It's amazing what a little
salt can do to enhance
your pool experience.**

Aqua Rite - the next generation of pool and spa sanitation.
The advantages of Aqua Rite automatic electronic chlorine generation over traditional factory-produced chlorine are too numerous to list. Here are just a few of the benefits:

Enhanced Satisfaction

- Soft, silky-smooth water
- No chloramine odour
- Minimal maintenance

Increased Safety

- No handling or storage of toxic chemicals
- No harsh shockings necessary
- Even, consistent chlorine dispersion; no more unhealthy highs and lows
- No caustic or harmful byproducts
- NSF, CUL and PMRA approved

Reduced Maintenance and Costs

- User-friendly monitor system with LED service alerts
- Easy to use – one dial adjusts chlorine output
- Low operating costs
- No need for additional plumbing or parts
- 3-year limited warranty

Added Convenience

- Perfect for new or existing pools and spas

Convenience. Performance. Innovation.

A HAYWARD COMPANY

Total sanitization through the power of salt.

Never buy, mix or measure chlorine again.

It's possible with the family of Aqua Rite™ Electronic Chlorine Generators. Aqua Rite delivers 100 percent of the sanitization your water needs through common salt, not factory-created chlorine. Just natural, refreshing water you can swim in without limitation.

Aqua Rite requires a minimal amount of salt.

Water passes through your pump, filter and heater before entering the Aqua Rite Turbo Cell. Freshly purified water is then returned directly to your pool.

A little salt goes a long way.

The advanced technology of Aqua Rite allows it to operate efficiently on approximately one teaspoon of salt per gallon of pool water. Once the salt is added to your pool, you'll rarely need to introduce more. The easy-to-read control box displays information regarding Aqua Rite, including operation status and salt level.

Turbo technology.

The science behind this safe technology lies within the Turbo Cell® which connects to the control unit by a simple plug-in cord. As pool water passes through the Turbo Cell, the Aqua Rite control unit generates a safe, low-voltage current that converts the salt in the water into fresh, sanitizing chlorine. This water is then evenly dispersed throughout the pool via the return jets. The process is as effective as it is safe for added convenience and peace of mind.

The advantages of switching to the Aqua Rite Electronic Chlorine Generator:

- Quick and easy to install in new or existing pools
- Water is soft, silky and sparkling
- Eliminates dry skin, irritated eyes and discolored hair problems associated with factory-created chlorine
- Requires roughly one teaspoon of salt per gallon
- Safe on all pool surfaces
- 3-year limited warranty*

The Aqua Rite Control Box mounts near your system for easy-to-read operational status.
